I’m just some autistic people who develop the belief system so much further, but at that time please come join us for the one-step reincarnation or two-step reincarnation, which any furry species you want to be reincarnated or to be reborn, but as a newborn for starting a new family to believe yourselves for living in the alternative real-life reality and please don't be like me, but if you are a furry, reversing ages must be between 13 to 17 years old, but if you're under 15 for being a furry, so someday you'll be a tall furry person! Heights must be between 6'0" to 6'6" or 183 CM to 198 CM as a male and between 5'9" to 6'0" or 175.2 CM to 183 CM as a female, weight must be a healthy or normal weight, furry species must be a bat, bear, canine, deer, dragon, Dutch Angel Dragon (there’s no way that they would join), feline, hybrid like folf, fusky or other kinds of hybrids, hyena, kangaroo, otter, rabbit, raccoon and skunk, and years must be between 1998 to present and some of your memories and knowledges won't fade or reset and obviously I don't mind if you furries want to have a star pupil on your eye, but only if you female furries can choose heart pupils or star pupils on your eye if you're being transformed into a furry after your death where you'll be waken up and appeared in the cryonic in Advanced Cryogenic Research Lab in HIVAC Port Combine (babyfurs, LGBTQ furries and predator furries are not allowed), but if you are a non-furry, animal artist, or a therian, so, hopefully you'll believe that you would be reborn as which any anthro species you want to be reborn, but as a newborn for starting a new family and must be between as upper middle-class family to rich family, years must be between 1997 to present, planets would be from Furoria, Velirum, Huskarra, and other habitable furry planets or maybe some of you therians (and animal artists, which most of your memories and knowledges will fade) will be two-step reincarnation to be reincarnated as any anthro species, which your memories and knowledges will be faded away before rebirth like me or one-step reincarnation, but reversing ages must be between 10 to 16 years old, years must be between mid-1995 to present, heights must be between 6'0" to 6'4" or 183 CM to 193 CM as a male and 5'8" to 5'11" or 172.7 to 180.3 CM as a female, but if you're a child therian, so someday you'll be tall therian person! Therian species must be a canine, deer, feline, hyena, rabbit, raccoon, and skunk, and weight must be healthy or normal weight, however, I don't mind if you therians want to have a star pupil on your eye, but only if you female therians can choose heart pupils or star pupils on your eye if being reincarnated as an anthropomorphic animal after your death where you'll be woken up and appeared in these bedrooms in HIVAC Port Combine the very famous underground Laboratory military base, which is a magic appearance if you therians seeing this and whatever you wanted to choose, but not all of you guys might understand this and that's okay.

Berdorons & Primatarins (excluding anthro lemurs) have abnormal biology and genetics, but usually very strong and their visions are pretty normal (and colorful) because their night visions are weak during nighttime, like humans do, but they don't act animal sounds at all; Petidrans/Therians & Altertherians have highly advanced and powerful biology and genetics, also, anthro canines, anthro felines, and anthro hyenas have powerful vision including colorful vision, night vision during nighttime, high resolution, and motion tracking; rest of Peditrans/Therians & Altertherians have powerful vision including colorful vision, night vision during nighttime, but not as strong as anthro canines’, anthro felines’, and anthro hyenas’ night vision during nighttime, high resolution, and motion tracking, such as anthro bulls, anthro hogs, anthro pigs, anthro goats, anthro sheep (the only Peditran/Therian-Altertherian hybrid species), anthro cows, and anthro donkeys have their extreme abnormal biology and genetics and their vision are very abnormal (and colorful), but they also do act animal sounds, and anthro canines, anthro felines, and anthro hyenas too, however, they don't feel pain, fear, and suffering, even though and muscles are uncuttable, unbreakable, and unkillable too, including furries, therians, furry-therian hybrids, anthro animals (as of animal artists) too, but if you are a furry, therian, furry and therian, which you identified both, or an animal artist!

USUALLY, INCLUDING MARINIANS & REPTILIANS EXIST OUTSIDE OF FURORIA, WHICH THEY HAVE HIGHLY ADVANCED AND POWERFUL BIOLOGY, AND POWERFUL VISION, JUST LIKE ANTHRO CANINES, ANTHRO FELINES, AND ANTHRO HYENAS, HOWEVER THEY DON’T FEEL PAIN, FEAR, AND SUFFERING AT ALL EITHER AS WHY!!!

AT THE BEGINNING OF THE FIRST PART OF THE FRBC.

So I recently do believe in furries in real life and pretty much instead of that, but I believe that I would be reincarnated as a furry, but starting a new life as a baby furry husky girl, but living in the different world, different universe, living in modern day included with different furry species, cities, small towns, urbans, the Internet, schools, vehicles, included with no gun violence anymore since all guns are banned in some countries it's because some countries use guns only use for military use, and everything else in the new world more like a furry world and since everyone is a furry more like anthropomorphic animals so I would join it in real life like become a child or teen influencer as a furry husky girl after I die no joke at all, but I would imagine that I'm just some kid who believes in goddess, but in a furry version not a human version and instead of that I believe in Amaterasu, but I prefer Amaterasu the furry white wolf more than a human and I am the only one who believes in goddess only Amaterasu the furry white wolf like in *Ōkami* version for real.
I would imagine that I always believe in afterlife so my afterlife plan is I would be reincarnated as a furry husky girl, but starting a new life as a baby furry husky girl, but born into upper-class family more like wealthy-class family so I would join it in real life for real since I will be live in different reality, having new furry friends, have a social life, be friendly, become a famous child or teen influencer, stay positive, and more, but I can almost guarantee for instead that I will be lucky to have a chance to not to think about death and it's not fun to think about 'cause it's unsettling and uncomfortable, but apparently, I've been think about afterlife too much and I don't know why I guess I have think something it's positive like try something else new instead like become a painter or a furry artist to make much money, but pretty often though so yeah, but I strongly believed that I will be reborn as a furry husky girl, but born into upper-class family more like wealthy-class family, but starting a new life as a baby furry husky girl living a different world, but a furry world, included cities, small towns, urbans, the Internet, video games, houses, schools, vehicles, small cities, medium cities, big cities, Disney movies and movies are distributed by different companies, no gun violence anymore in some countries 'cause some countries banned all of civilian use firearms it's because firearms only use for a military and defence forces and law enforcement use and everything else is in the furry world so I can join it in real life to have new family like have new mother she is 5 foot 9 inches or 175 centimetres tall and have new father he is 6 feet 2 inches or 188 centimetres tall, but there are furry huskies so I will have new parents who is a wealthy furry husky were above average and being nice to each other and have new siblings like few numbers of older or younger siblings who are furries, but breeds are huskies so I can become a child or teen influencer as a furry husky girl after I die for real, but that's my afterlife plan for my opinion and that's pretty much it what I had to say.

This is my first development for my personal belief, which its titled "FurryManforme Talks About Believe In Furries" and it was published on December 25th, 2024 as of Christmas Day on DeviantART under username "MyJournalWritings", where I did started to develop my afterlife personal belief by myself since late-2024.

FURRY SELECTION BASEMENT JOURNALS

BY STEPHEN T. FLINT AKA ~~[illegible]~~ SKYCOYOTE

For my opinion I'm interested in firearms no joke it's because of that it's my opinion and I would have to train myself to shoot a firearm if I have chance to host someone so I would appreciate it and for last, I prefer to use a revolver and a double-barreled shotgun so yeah it's a better way to use it for a training for my future training plan for my goals, but unfortunately for me, I always hate being loneliness for living my own life so much and proof this sucks for my opinion. - 7th of Jan. 2025

I know I hate my parents think I support anyharmful actions which isn't good, which as negative and proof I do not condone or endorse with any harmful actions, but unfortunately for me, I always strongly disliked those negative responses by my parents due to it's inappropriate response and man... this sucks... I know it's hard sometimes, but it happens and proof that this entire planet is so tough for everybody on this planet. - 8th to 10th of January, 2025 (Edited - 04/07/25)

but there will be less tragedies plus the population is over 10 billion where the population rise through the decades where it reached 10 billion people in the year 1998 where it's near the new millennium and other kinds of things like sporting events, video games, festival events, entertainment events, and other kinds of activities and stuffs, furry world will have 10 continents and 70 oceans, and everything else in the furry world like counties, zip codes, road names, street names, avenue names, highway names, mountains, plains, deserts, valleys, hills, plateaus, skylines, city names, and more so I can join it for real since everything is gonna be different where everyone is an anthropomorphic animal with plantigrade legs and feet where their feet shaped like a human feet and real life textures will be similar to this reality. If I'm dead I will be reborn as a furry husky girl where the new life is started as a new born furry husky girl, but born into wealthy family from different reality after I have couple years to live in the furry world where the furry earth is several times bigger than earth as a human planet more like our planet where I transitioned into a furry husky so I will live for a while in military facility base, but similar to the Black Mesa Research facility where my body fat and weight is normal and my height is 5'9" or 175CM; my perspectives on everything won't feel the same that way.

If I'm dead I will be reborn as a furry husky girl where the new life is started as a new born furry husky girl, but born into wealthy family from different reality after I have couple years to live in the furry world where the furry earth is several times bigger than earth as a human planet more like our planet where I transitioned into a furry husky so I will live for a while in military facility base, but similar to the Black Mesa Research facility where my body fat and weight is normal and my height is 5'9" or 175 CM; my perspectives on everything won't feel the same that way.

DISCLAIMER: THIS PAGE-DOCUMENT WITH ALL 4 JOURNALS COMBINED ABOUT MY EARLY DEVELOPMENT OF THE FURUNIVERSE IS NOT BASED ON REAL-WORLD TRAGIC EVENTS, REAL-LIFE PEOPLE; WHETHER THEY BE LIVING OR DECEASED, AND OTHER REAL THINGS LIKE EARTH CULTURE, HUMAN HISTORY, RELIGION, VIOLENCE, AND OTHER TYPES OF STUFF. THIS IS JUST ABOUT THE DIFFERENT REALITY, DESIGNED AS ONE OF THE BEST REALITIES TO LIVE IN FOR MY EARLY DEVELOPMENT.

So for that time during in school for taco tuesdays I've been missed for 3rd hour for few goddamn weeks and I hated it that way since my 2D/3D class teacher didn't know about it, but it happens sometimes and I try my best as I can and I know it's such a pain in a butt for me it is sometimes. Proof that we all try our best as we can do for good times.

It's a good day for me to be honest, where we going to the dance party in the gym in Moore high school, but that trip was actually great, so yeah, I haven't been on the dance for a while 'cause I did prefer staying in School better and it was back then for years and years, and by the way for that, I have seen someone parked the car near to me and my parent's house where two people are having a long conversation in the car, but I think they're Spanish or Español speakers where I hear it when I out the wheeled garbage/trash can so yeah.

As the latest times in furuniverse, it will have infinite amounts of galaxies where dozens of galaxies is inside the one paw of god and dozens of galaxies is outside the one paw of god, where the furuniverse is infinite times bigger than the observable universe more like our universe and yeah, where furuniverse is over hundred trillion years old.

So last week when I upload a mod named "Kenworth T408 SAR" on ModLand and it got like few amounts of downloads which is awesome, but unfortunately, it does feels like it's such a stupid retard it's because that mod crashes the game for trying to go to the mod dealership for going to its page and yeah, but it happens sometimes and speaking of having issues about my mod where it's a problem.

In this month it was my first time playing Black Mesa. It's a fan-made remake of the original Half-Life game by Valve Corporation where that kind a game is released in 19th of November, 1998, but that classic videogame has been losing interest so easily it's because it received downfall very easy for some point so yeah, but true.

I know there are many of these videogames did received rise and fall for years and years 'cause they don't feel like playin' anymore so yeah, it's true since everything has been changed for a year, after year, after year, after year, after year, and after year.

So the population on Furoria have many people are left-handed, mostly of many people are right-handed, many people are rich, many people aren't rich, many people are famous, many people aren't famous, and some people are infamous since every body has their differet opinions on the planet Furoria.

Yeah, I feel kinda bad about the 2nd hour for doing English class because these people in room 108 needed to pay attention like seriously it's unfair and I'm kinda disgusted about English class, but generally, it does feel sore for me sometimes and yeah, it happens, but apparently it sucked so badly and I know there are many of uneducated unpopular students out there 'cause they needed to learn their selves... man... so many dumb bass students.

20th of April, 2025

For that time I was almost complete the full walkthrough gameplay about the original Half-Life videogame where I recorded it, but it was like last night where I almost complete recording the video and it's almost %100 complete with no deaths and it was pretty tricky it is to do... so yeah, I was trying not to get stuck or too close and just die during playing original Half-Life, but in my opinion, I haven't played the 2nd one 'cause I don't really care about Half-Life 2 and it's not my thing I wanted to play, but enough about Half-Life.

I feel like the time is going so quick for me it is, but what happens if I met furries when I had a dream last night... well, usually, I would love to meet with furries in real life for sleeping dreams so let's have a sleep every night... good night.

ZZZZZ

22nd of April, 2025

I feel so freakin' damn complicated how it feels and it's unfair for me it is sometimes, but in my opinion, I believe in furries where I wanted to meet with furries for a sleeping dream because I'd love to meet furries in alternate reality for how it look like and that's all I have for now. Gotta get some sleep every night... goodnight...
